

ISE 10 Washing Machine

ISE1606W

Products carrying the ISE 10 brand are the best engineered most durable domestic appliances on the market. Each component tested to last at least 8000 cycles and using the same bearings as Volvo trucks, ISE 10s carry a ten year guarantee. This means that if you did one wash per day 365 days per year it would take over twenty years before they started to wear out.

Armour coating

Most washing machines are painted with an enamel coating which can discolour through time, crack or peel. ISE10 is powder coated which is bonded to the steel outer casing giving an exceptionally durable and long lasting finish that won't fade, rust, peel or crack, with no harmful emissions or waste generated at the factory.

More steel, less plastic

On ISE10 where steel or metal can be used instead of plastic it is. This is simply to aid durability and longevity of the machine as well as to increase the reliability as metal components are far less liable to failure. We are so confident in the build quality of the ISE10 range that has a full ten years parts and labour guarantee included by AXA Insurance.

Advanced Performance

It is usual to expect a compromise on performance, especially in the wash time, on an ecologically friendly machine but not so with ISE10. Under most conditions an ISE10 washing machine will complete a 40°C wash more than 40 minutes faster than any other washing machine without compromise on the cleaning results.

Tub unit

Stainless steel inner and outer drums for longevity.

The whole tub unit is uniquely suspended on the shock absorbers leading to outstanding stability and noise reduction

Iron weights

Cast iron weights are efficient, less prone to failure and unlike concrete ones can be recycled and that's why we use them even if they cost a little more.

Quattro

The ISE10 washing machines are built on a solid metal chassis with a unique four point suspension system which offers greater reliability and stability.

SmartSeal

The door also seals directly onto the drum front so that there is no door seal to leak or that clothing can catch on causing damage

Simple ergonomics

We believe that appliances should be simple to operate and ISE10 is our simplest ever to use as you would expect from Swedish design.

Simply select the clothing type you want to wash and press "Start". It's that easy.

Specifications

Performance

Energy, class: A
Wash result, class A
Spinning, class A

Programs

Heavy wash, 95°C, 135 min
Heavy white wash, 60°C, 120 min
White/Colour wash, 40°C, 65 min
Synthetic wash, 40°C, 65 min
Quick wash, 40°C, 35 min
Wool/hand wash, 30°C, 40 min
Rinse, 15 min
Spin, 10 min
Drain, 1 min

Options

Temperature choice: cold or 30/40/50/60/95°C
Spin speed: 0/800/1600 rpm
Delayed start 1-24 h

Capacity

50-litre drum/6 kg wash

Comfort

Drop-down door
Remaining time on display
Program memory
Auto door opening after program end
Balance control
Capacity cotton (Kg) 6 kg
Cold wash option

Start delay time max. (h) 1-24 h

Energy Use/Environmental

Energy consumption (kWh) 0,17 kWh

Marked for recycling

ISO 14001 certified production

Dimensions (mm)

Height: 850

Width: 595

Depth: with drop-down door open:

1080 without door open: 585

Environmental benefits of a longer lifespan

When people consider their carbon footprint the issue of quantity on products they replace is often overlooked. Every year in UK we throw away enough electrical product to fill the new Wembley Stadium to the roof six times over.

The energy used in production, transportation, packaging and disposal every time you replace your appliance is contributing to global warming on a massive scale. To help combat this problem we design our appliances to be not only durable but also to be repairable so that the machines can remain in service for as long as possible. Coupled with our policy of not profiting from spares we feel that we can have our machines in service for much longer than most. This combined with our use of local service to both deliver and install as well as provide maintenance and support we help to minimise the emissions throughout the entire life of our appliances, not just on the consumption of water and electricity every time you use it.

All ISE products are 'A' rated for electricity and water consumption but we believe that's where a manufacturer's environmental obligation begins not ends. We are the only manufacturer asking people to buy our products only as a last resort when your existing machine is beyond repair
